Prashad begins by examining the history of the relationship between Asia and the West. He shows that the two regions have been interconnected for centuries, and that their interactions have been both positive and negative. However, he argues that the dominant narrative of the relationship between Asia and the West has been one of conflict and misunderstanding.

Prashad challenges this narrative, and argues that Asia and the West are actually more similar than they are different. He points out that both regions

have experienced periods of great prosperity and decline, and that both regions have been shaped by war, revolution, and migration.

Prashad goes on to argue that Asia and the West share a common logic of 'One World'. This logic, he says, is based on the idea that the world is a interconnected and interdependent system. Prashad shows how this logic has shaped the economic, political, and cultural development of both regions.

Asia, the West, and the Logic of One World is a timely and important book. It offers a new perspective on the relationship between Asia and the West, and it challenges the dominant narrative of conflict and misunderstanding.

Prashad's book is a must-read for anyone who wants to understand the complex relationship between Asia and the West. It is a groundbreaking work of scholarship that will change the way we think about the world.
